PROFESSIONAL SUMMARY

Materials Planning and Supply Chain professional with 5+ years of experience across high-volume, fast-paced automotive manufacturing, production-facing material coordination, logistics operations and supply chain analytics. Experienced in supporting C-EPS (Column Type Electric Power Steering) production by translating production schedules into material availability, WIP and replenishment actions, with hands-on exposure to GMES, inventory control, shortage management and supplier coordination. Advanced user of Excel, Power Query and Power BI for data-driven planning and operational analysis. Proven track record of reducing material stock-outs by 40% while maintaining 99%+ inventory accuracy. MSc in Logistics & Supply Chain Management.

CORE SKILLS

- **Materials & Production Planning** — Materials Planning • Material Requirements Planning (MRP) | • Production Schedule Support • Material Availability • WIP Control • Replenishment Planning • Shortage Management • Demand Coverage • Model Changeover Readiness • Line-Side Material Coordination
- **Inventory & Supply Planning** — Safety Stock • Reorder Point • Min-Max Planning • Days of Cover • Inventory Turnover • ABC/XYZ Classification • Material Criticality • Inventory Accuracy • Lead-Time Management • Supplier Coordination • Expediting • OTIF Support • BOM / Material Master Accuracy
- **Systems & Analytics** — Advanced Excel • Power Query • Power BI • GMES (ERP/MES) • Data Cleaning & Validation • Inventory Variance Analysis • Dashboard Reporting • Scenario Analysis • SAP / Oracle Exposure
- **Technical Exposure** — SQL – Working Exposure • Python – Basic Working Exposure for Data Analysis & Scenario Modelling

PROFESSIONAL EXPERIENCE

Materials Planning & Supply Chain Analytics Intern 04/2026 – 09/2026 | South Wales, UK (Remote)
Mentika Process Outsourcing Ltd

- Supported materials planning and supply-chain analytics within a UK high-value manufacturing environment, analysing **55,000+ records across approximately 1,964 unique materials** covering inventory, demand, lead time, WIP and operational performance.
- Analysed demand variability, inventory position and supply risk using **ABC/XYZ** segmentation and material criticality analysis to prioritise high-value, volatile and supply-sensitive materials.
- Evaluated material availability, WIP and demand coverage, replenishment requirements and lead-time performance, developing planning logic for Safety Stock, Reorder Point, Days of Cover, Inventory Turnover and Service Level.
- Processed and transformed large planning datasets using Advanced Excel and Power Query, improving data consistency, repeatability and material-level reporting readiness.
- Built interactive **Power BI dashboards** covering WIP and inventory performance, RAG-based shortage risk, material trends, manufacturing scrap, machine performance and shift-level variation.
- Conducted lead-time, disruption and supply-chain scenario analysis to assess impacts on safety stock, service levels, sourcing, cost, emissions and material availability, with Python used as a supporting tool for basic analysis and scenario modelling.

Seasonal Warehouse Operations Assistant 11/2024 – 01/2025 | 11/2025 – 01/2026 | Grays, UK
Amazon Logistics

- Re-engaged across two seasonal peak periods within a high-volume Amazon Logistics operation, consistently achieving stow rates of approximately **400 parcels per hour** while maintaining accuracy and operational flow.
- Used WMS handheld systems to scan, stow and relocate inventory, maintaining accurate location data and resolving stock-location discrepancies through bin-to-bin relocations and corrections.
- Coordinated with inbound and outbound teams during congestion and shift handovers, supporting smooth warehouse flow and continuity during peak demand.

HL Mando Anand India Pvt Ltd | Korean-Indian automotive joint venture

Production & Materials Coordinator

05/2019 – 07/2023 | Chennai, India

- Coordinated daily material planning and production support for high-volume **C-EPS (Column Type Electric Power Steering)** assembly operations, working from Production Planning schedules and after-sales parts requirements to align material availability, WIP and replenishment with planned output.
- Managed material availability across mechanical, electrical and electronic C-EPS components while monitoring line-side inventory, WIP and consumption to identify shortages, excess quantities and material mismatches and coordinate timely replenishment.
- Supported a primary conveyor line producing approximately **850 units per shift**, with additional responsibility for an adjacent manual line producing approximately **450 units per shift** when operational coverage was required.
- Supported model changeovers and production readiness by verifying component availability and WIP status, while maintaining accurate material consumption, inventory, WIP and finished-goods transactions in **GMES**.
- Coordinated with Production Planning, Procurement, Stores, Quality, Production, Logistics and suppliers to monitor lead times, expedite critical materials and resolve supply or quality constraints affecting production continuity.
- Analysed material shortages, rejection trends and recurring operational issues, supporting root-cause analysis, 8D and Kaizen activities to improve material flow and production stability.
- Contributed to a **40% reduction in material stock-outs while maintaining 99%+ inventory accuracy**, supporting stable C-EPS production and material availability.

Apprentice - Assembly & Logistics

05/2018 – 05/2019 | Chennai, India

- Supported goods inward, material receipt checks and inventory updates, with practical rotations across assembly, material staging and dispatch operations in a high-volume automotive manufacturing environment.
- Monitored production output and rejection levels, supported QC at source and finished-goods dispatch preparation for **Mobis**, while documenting downtime and contributing to 5S, Kaizen and OEE improvement activities.

Projects

Material Planning & Inventory Visibility Dashboard

Built a Power BI planning dashboard using Excel and Power Query to monitor **WIP coverage, Days of Cover, inventory turnover, service level and RAG-based shortage risk**, with material-level filtering and replenishment visibility.

Manufacturing Scrap Root Cause Analysis

Developed a Power BI dashboard to analyse **scrap rate, material contribution, machine performance, shift-level variation and Pareto trends**, supporting identification of major loss drivers and process improvement priorities.

Supply Chain Resilience & ESG Scenario Analysis

Evaluated sourcing, cost, lead-time and emissions trade-offs across **baseline, disruption and carbon-constrained scenarios**, using Excel, Power BI and basic Python-supported modelling to compare resilience and sustainability outcomes.

EDUCATION

MSc Logistics and Supply Chain Management, *University of Hertfordshire, UK*

2023 – 2024 | Hatfield, UK

B.Tech Mechanical Engineering, *SRM Institute of Science and Technology*

2019 – 2023 | Chennai, India

Diploma in Mechanical Engineering

Manakula Vinayagar Polytechnic College

2016 – 2018 | Puducherry, India

CERTIFICATIONS

- Preparing Data for Analysis with Microsoft Excel — Microsoft / Coursera, 2025
- SQL: Data Reporting and Analysis — LinkedIn Learning, 2024
- Predictive Analytics Essential Training: Data Mining — LinkedIn Learning, 2024
- Lean Manufacturing & 5S — HL Mando
- Structured Root Cause Problem Solving (8D) — HL Mando
